A Conversation with RISPRI

RISPRI acknowledges the importance of promoting and developing our future professionals. We want to be part of interpreting students training.

We invite all interpreting students to a dialogue forum with RISPRI Board Members about myths and realities in the profession. In addition, we want to establish a Special Interest Group (SIG) to promote leadership, receive your proposals and look out for the interpreting students best interests, our future professionals. There we will elect a directive for the group.
